About Me

I'm Dhruv Joshi, a full-stack developer passionate about tackling large projects. I specialize in creating user-friendly websites using technologies like HTML, CSS, Tailwind CSS, JavaScript, React, Node.js, Express, and MongoDB. My goal is to build dynamic, responsive applications that enhance user experience. I love collaborating with teams to bring innovative ideas to

Projects

Forever Wears || Ecommerce Project Tech-Stack: HTML, Tailwind CSS, JavaScript, React 💖

Key responsibilities:

- Implemented a fully functional "Add to Cart" system, allowing customers to easily select and manage products.
- Designed a responsive and visually appealing user interface for seamless navigation across all devices.
- Prioritized performance and accessibility, ensuring a seamless shopping experience on both desktop and mobile

Portfolio Template || Landing Page Tech-Stack: HTML, CSS, Bootstrap, JavaScript

Key responsibilities:

- Integrated JavaScript for interactive features like smooth scrolling and pop-up modals, with easy customization and modular structure.
- Ensured responsiveness across all devices, adapting seamlessly to various screen sizes for an optimal user experience.

Movie Project | CRUD Operation Tech-Stack : Node, Express, EJS, MongoDB

- · Key responsibilities:
- · Utilized EJS for server-side rendering, enabling dynamic display of movie names, titles, and images.
- Integrated MongoDB as the database for efficient storage and retrieval of movie data.
- Designed a beautiful and attractive UI, enhancing user experience and engagement with the platform

Certification

Red and White Multimedia Education Master in Full-stack Development
